ADJUSTABLE HOSEL
6 position Fast Fit™ settings for ultimate control

1. Place the end of the grip on the ground while holding the club head.

2. Set the wrench tip into the hosel screw. To loosen, turn the wrench counter clockwise. As you loosen the screw, apply slight pressure upwards on the head to disengage the hosel adaptor.

3. **GREEN MEANS GO** - Loosen the screw until the green band becomes visible (about 4-5 complete wrench rotations). Rotate the shaft in the direction of the arrows until the dot for the desired setting aligns with the dot on the back of the hosel.

4. Tighten the screw by turning the wrench clockwise until the wrench clicks.
**VISIBLE SWING ACTIVE TECHNOLOGY**

1:1 Alignment and swing plane guide for consistent ball striking

WARNING: READ INSTRUCTIONS COMPLETELY BEFORE USE. Failure to follow these instructions and failure to properly tighten the head and weight may create a risk of serious injury. Clubs and club components should be inspected frequently, before and during play, to ensure all connections and parts are secure. All components must be properly tightened prior to use. Use only Wilson authorized club components and wrench.

Only the Wilson Staff® Multi Fit System wrench should be used with adjustable Triton™ products. Also, only Wilson Staff® approved shafts, hosel adaptors and weights should be used with adjustable Triton™ products. Use of components and/or wrenches from any other source could damage the club, void the warranty and/or cause injury.
